

## PRODUCT DATA SHEET

**Product Name:** Portable Nano Atomizer  
**Pack Size:** 1 Unit  
**Box Size:** 18.5cm(L)x16.4cm(H)x6.3cm(W)  
**SKU:** 630-111

### Description:

- Easy to use hand-held fogging unit
- Atomizes liquids into a fine mist for fogging
- Charged via USB cable Micro-B
- Holds 250ml of liquid
- Lithium battery

### Applications:

- Fogging of any enclosed area
- Any type of room in your home, office, school hospitals etc
- Cars, trucks, buses, mini buses, camper vans, camp trailers etc
- Air conditioning units
- Walk in wardrobes

### Features & Benefits:

- Easy to use & fast acting
- Cost effective, minimises wastage with controlled flow of flow.
- Improved air quality when SAN-AIR products used.
- Provides broad product coverage, with minimal liquid use.

### Directions for use:

- Check unit is charged by checking the charging indicator on handle.
- When on, the unit should make a noise & lights will turn on.
- Unscrew the clear liquid tank in front of the handle. Fill with appropriate SAN-AIR liquid:
  - Surface Mould Remover
  - Household Grade Disinfectant
  - Surface Sanitiser
  - Diluted LD Concentrate (refer PDS)
  - Diluted Coil Cleaner (refer PDS)
- Screw filled liquid tank back onto unit.
- When you are ready, press start switch on inside of handle & the product will begin to mist the liquid from the resevoir out of the spray mouth.
- If putting the unit down, ensure it stays upright to prevent any leakage into internal components.
- When finished fogging remove any remaining liquid & place in another bottle.
